

Summer Enrollment Reaches All-Time High at MSC Campus

The Northwest Missouri State College campus came alive after its two-week-long slumber as more than 1,400 students had registered for summer school last Monday.

This is a record number for summer school enrollment here.

Of these summer students approximately 230 are enrollees in the new graduate program adopted by NWMSC this summer. In addition 73 students are enrolled in the University of Missouri Coop-

erative Graduate Program.

Six workshops also brought many other students to the campus this week. The Registrar's Office reports that 30 students are enrolled in the Aerospace Education Workshop, 55 in the High School Publications Workshop, 15 in the Two Dimensional Learning in the Visual Arts Workshop, 30 in the Physical Education for the Mentally Retarded Workshop, 18 in Kindergarten — Pre-School Workshop, and 11 in the Agriculture 243 Workshop — Livestock Evaluation and Selection.

The Junior High School band clinic enrolled a total of 324 students.

Late Wednesday approximately 200 Gamma Sigma Sigma Service Sorority coeds moved into Hudson Hall for their National Convention. They will be on campus until Sunday evening.

Treasury Department Relaxes Regulations

Teachers who have had educational expenses in the past three years will welcome news that the U. S. Treasury Department has issued amended income - tax regulations that spell more liberal rules for deductions for such expenses.

Retroactive to 1964, the regulations allow teachers to take deductions back as far as 1964. To obtain the retroactive break, teachers must file Form 843, available from local Internal Revenue Service offices, according to the NEA Reporter.

Record Number Of Cheerleaders Enrolled in Clinic

Northwest Missouri State College will host 388 cheerleaders from 68 schools in Missouri, Kansas, Iowa, and Nebraska at the seventh annual cheerleader clinic June 25-30.

The junior and senior high school clinic, under the direction of Miss Bonnie Magill, chairman of the women's physical education department at MSC, will include sessions in pom pom, flag, and footwork routines, tumbling, pep rally, new cheers, chants, songs, and competition. Instructors who will supervise these sessions are members of the National Cheerleading Association. They have been trained by "Mr. Cheerleader" Lawrence Herkimer, in Dallas, Tex.

Schools entered in the clinic include: Missouri — St. Joseph Central, Faucett, Gallatin. (Continued on Page 2)

District Project Involves Action Approach to Teaching-Learning

Coordinators Examine Project Equipment

Dr. Bennat Mullen and Mr. Bill Hinkley survey some of the equipment to be used in Project Communicate. Included are a tape recorder, closed circuit television, and camera.

Project Communicate is a first on Northwest Missouri State College campus, a first in Northwest Missouri, and a first in the nation.

According to Dr. Bennat Mullen, project director, "It is designed to assist schools in the development of an action approach to the teaching of communication skills which allow the student to do more reading, writing, and speaking as a part of regular class activities."

Eighteen counties are the locale for this 3-year project. Funds from the Federal government provided under Title III have been granted to the project.

Congressman William R. Hull stated that the amount granted to the project is \$450,513 per year. Over one million dollars will be granted for the entire project.

Sponsored by the Chillicothe School District, the project will have its main headquarters in the McREL building of Maryville. Other offices will be located strategically at Trenton, Chillicothe, and St. Joseph.

A summer consortium part of the project is involving directly the NWMSC campus. The project has screened 40 teachers from throughout Northwest Missouri who are attending classes this summer to become acquainted with the

methods of teaching English as developed by the project.

The three major divisions of the project are reading, writing, and speaking. Specific skills that are being taught by project members are the writing of units for effective teaching involving the student, frequent usage of instructional media, and the analysis of student response.

Other programs throughout the year include demonstration classes for various participating primary and secondary schools, workshops, services through media depository available to schools and teachers, and a pilot project sponsoring the sharing of media.

Dr. Mullen is the over-all coordinator and Mr. Bill Hinkley is the associate director. Both have their offices in the McREL building. The advisory board for the project is headed by Charles Seward, assistant superintendent, Chillicothe. Other members include Max Coleman, St. Joseph; Supt. Bill Ray, Trenton; Richard Weiderholt, Mt. Alverno Academy, Claiborn, Savannah; Supt. Melvin Twaddle, Albany; Supt. Donald Palmer, Oregon; Ray Nelson, Cameron; Supt. Gerald Thompson, Princeton, and Supt. Roy Rupp, Brookfield.

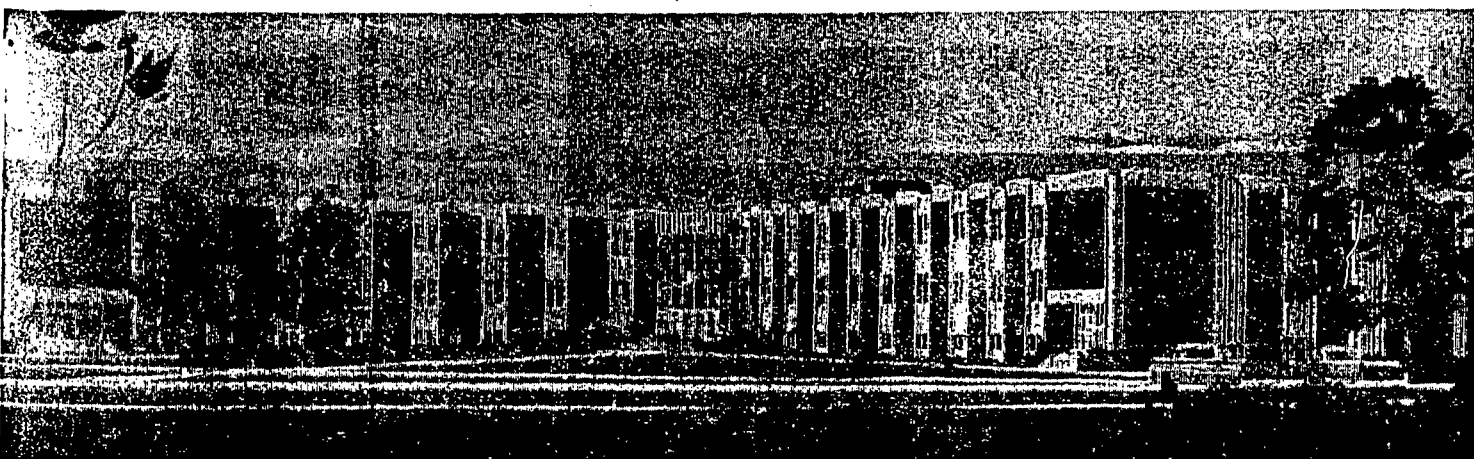

Ex-officio members of the board include Richard Wiederholt, Mt. Alverno Academy, Maryville; Father Duane Ryann, St. Joseph, and Dr. Charles Thate, NWMSC.

Music Teacher to Transfer

Jerry J. Troxell, '57, will be an instructor of music at Albion College, Albion, Mich., beginning this fall.

Mr. Troxell was an instructor in the music department at MSC this past year.

Classes Scheduled for New Science Building in Fall of '68

Students will attend classes in the Science Building now under construction in the fall of 1968 if plans proceed as scheduled, according to Professor Theodore Weichenger, acting chairman of the Division of Science and Mathematics.

Located north of the Administration Building, the three-story structure will house the departments of chemistry, bi-

ology, physics, and geology.

Features of the building will include two lecture halls, each accommodating 135 to 140 people. Designed similar to those in Colden Hall, it will have a ground floor entrance and a second floor entrance.

Separate laboratories, classrooms, and offices will be available for the different courses. The largest classroom

will seat 60.

The Chemistry Department will be located on third floor; Biology Department on second floor, and physics, geology, and science methods courses will be instructed on the first floor. New furnishings and science equipment will be purchased for the building. The old laboratory equipment will be moved when the building is

completed.

Plans for remodeling the Administration Building are also underway for the Mathematics, Speech and Drama Departments, which will remain in that building.

Also remaining in the Building will be the administrative offices and the Departments of Home Economics and Agriculture.

Iowa University Grants PhD To Professor Robert Govier

Assistant Professor Robert Govier received his doctor of philosophy degree in German July 9 from the University of Iowa.

Dr. Govier also holds a bachelor of arts degree from Elmhurst College and a bachelor of music and a master of arts degree from the University of Texas. His dissertation is en-

vier points out that Boell is highly critical of the values of contemporary German society. He sees in the frantic struggle for a higher standard of living a phenomenon closely akin to, and as highly dangerous as the Nazi's racist theories and demand for "Lebensraum."

The dissertation shows Boell's belief that "the contemporary world is one of superficially camouflaged malice in which relief and significance is provided only by isolated manifestations of genuine human emotion, piety, prayer, and charity. He believes that these virtues are not found in those who are interested in success and who are ambitious, but more often than not in the lowly, the humble, the poor, the outsider, the black sheep, and those who have resisted the pressures of society on them to conform.

On the other hand, Boell believes that in the Irish is found a people who are not enslaved by the single-minded pursuit of social status, wealth, and efficiency — the modern world's alternative to religion. "They are the possessors of a simple social structure and a religious attitude toward life. Boell sees these attributes as being a possible solution to the world's ills," Dr. Govier has reported.

Dr. Govier taught at the University of Texas, North Texas State University, and the University of Iowa before coming to MSC in 1966.

IDEAL GIRL. . . One MSC instructor has quite definite ideas on what men should look for in a wife: Compatibility, understanding, intelligence, and capability. She should be well-rounded and easy to socialize with, he added.

The Stroller is now looking for ideas about the perfect male so that she will recognize him when she sees him!

Dr. Robert Govier

Service Exam Dates Extended to August

The Civil Service Commission has announced that the closing date of its Federal Service Entrance Examination has been extended to Aug. 10 to allow two additional nationwide tests this year.

Candidates should obtain a copy of Announcement No. 400 from any office of the Civil Service Commission, any major postoffice, or most college placement offices. The announcement contains complete instructions and the necessary forms for filing.

Faculty Bids Chairman: 'Happy Retirement'

Professor Surprised At Close of Career

As Dr. Joseph A. Dreps, chairman of the Department of Foreign Languages, closed his final class session at MSC, his teaching corps called him to the corridor to present him a parting gift.

Shown at the presentation are Charles Slattery, Robert Govier, John Walker, John Dougherty, Dr. Dreps, Mrs. John Mauzey, Miss Mary Jackson, and Joseph Wetzel.

Dr. Dreps, who has served at MSC under the leadership of three presidents, and his wife will continue to reside in Maryville.

Education Is Growing Up

It's about time!

Education in some areas is finally catching up with modern man. Someone is finally doing something and not just talking. An action approach to teaching has found a home — Northwest Missouri.

Why after all the years of educators and education, are people just now beginning to develop a way that a student can learn by doing?

Granted that this way has existed to some extent before in the laboratory sciences and mathematics and in some other classrooms, but what about a most essential part of education — language. English cannot be taught best by the lecture, memorize, and regurgitate method. Students must become involved. They need to see and do what they are being taught.

Project Communicate has done something about it. The sole purpose of this experiment is to show teachers that there is a more dramatic, involving result-getting way to teach reading, writing, and speaking.

How can a student learn to write just by hearing about it? How can a student learn to speak by giving two five-minute speeches in a year? These are questions that Project Communicate personnel have asked.

Now the teacher - enrollees are answering them by doing. They will be doing something rather than just talking about a laboratory approach to English for the next eight weeks. We predict that their students will also be on the discovery action line this fall.

—Beverly Beeks

Psychology Student Reports

Pollees' Ideas About Cheating at MSC

By Sue Calbreath

As a project for an educational psychology class, I chose to do a survey on cheating among students at Northwest Missouri State College.

I sent out a questionnaire designed to find out what students consider cheating, the prevalence of cheating at MSC, the reasons for cheating, and the effect of the instructors' attitude on cheating. I also wanted to see if the pollees thought that a tightening of regulations or an honor system would reduce the amount of cheating.

To make the survey as objective as possible, I took a random sample, using 250 questionnaires. I divided 250 into 3,307 (the number of students registered in regular classes) and found that I should send a questionnaire to every thirteenth person listed on the roster.

One hundred and five of the questionnaires were completed and returned. The answers to the question "What do you consider cheating" ranged from most checked to least checked: 1) Copying from another during a test; 2) letting someone copy from your test; 3) having someone on your assignments; 4) getting a copy of the test beforehand; 5) doing another student's assignments.

Sixteen participants listed other items they considered cheating. Most often mentioned was "crib sheets."

Through their own observations and experience, 69.5% of the participants stated that they believe cheating at MSC is "fairly common." "Very com-

was checked by 18.5% and "rare" by 12. The answer marked most often as the reason for cheating was "fear of failing a test or course." Social pressure ranked second.

An instructors attitudes concerning cheating were believed by 90% of the participants to have a direct effect on the cheating done in his class.

When an honor system was mentioned, 92 students reported that they thought the results would be either "no change in the amount of cheating" or "more cheating."

The results of the survey indicate that these pollees believe cheating is fairly common at MSC that a majority of those who cheat do so for fear of failing, and that the instructor's attitude affects the amount of cheating in class.

From my study of the results, I have developed several suggestions: Stricter supervision during tests should be observed. Oper files on old tests and new tests used each time would reduce cheating. Also, closer association between instructors and students would be beneficial.

Teachers could thus easily discern the student's writing style. This plan would discourage the use of a "ghost writer." Finally, a firm, clear statement of an instructor's expectations and punishments concerning cheating, along with removal of as much temptation as possible by seating arrangements and proctors would surely reduce cheating.

Roy Walker Gets Doctor's Degree

Roy Walker, member of the Division of Education faculty, received his doctor of education degree last week from the University of Missouri.

Dr. Walker, a former instructor at the University of Missouri, has taught at North-

Dr. Roy Walker

west Missouri State College for one and one-half years. He received his BS in E degree at Arkansas State University, Jonesboro, and his MA degree at George Peabody College for Teachers, Nashville, Tenn.

For three years, Dr. Walker was a member of the evaluation committee of the LaDue School District's teacher merit system. He has also served as president of the Stoddard County Principals' Association.

"I developed an approach to evaluating the effectiveness of summer schools by determining what attitudes students and teachers held toward them in comparison to their opinions about school during the regular sessions," commented Dr. Walker, when asked about his thesis for his doctorate.

Travel, records, reading, and activities with his family are listed high among Dr. Walker's pastimes.

Are Students Apathetic?

If such a headline were to appear on the front page of this weekly college newspaper, students might take issue with the statement and express their objections. Most likely, however, they would not.

Why? Because students on this campus are seemingly apathetic.

Oh, a few students are concerned with problems and issues on campus and a few more say they are. But the majority of the students apparently are not.

Of the 3,355 undergraduates enrolled last semester, only four returned the questionnaire that was printed in the Northwest Missourian requesting ideas for changes in the paper. The day before candidates for student body officers were to register their names in the dean of student's office, no one had registered for student body president and only one person had registered for vice president. Several candidates were unopposed in the election.

Furthermore, fewer than 25 women students from two residence halls attended a meeting held to introduce candidates who were running for Student Senate from the halls.

Apathy on campus is further proved by the fact that only one-third of the students voted on election day.

This was the picture at MSC last semester. Will it be different this summer?

Where are you, summer schoolenrollees? — in an emotional vacuum of uselessness or on a stage of reality ready and willing to act?—Marjorie Hitchcock

Former Bearcat Standout Named Assistant Grid Coach

Jim Redd, St. Louis, former star football player at Northwest State College, will return to join the coaching staff this fall.

Redd will serve as assistant football coach working mainly with linemen, according to a

Coach Jim Redd

report from head Coach Ivan Schottel.

Redd attended Kansas University his freshman year and came to Maryville to complete his college work. While enrolled here, he lettered in football three years. He was elected captain his senior year.

Also during his senior year Redd was named both defensive and offensive MIAA tackle and won the MIAA Sportsmanship Award.

After graduating in 1965, the new mentor was a graduate student at the University of Colorado, where he served as assistant to the football coach. He has earned his master's de-

gree and is working toward his doctorate.

In discussing the new assistant to his staff, Coach Schottel stated, "We selected Redd because of his high caliber of play philosophy, which we believe will help the team a great deal. He understands the game thoroughly and communicates with his men."

In high school Redd was a standout in both football and basketball at Christian Brothers College High School, St. Louis.

Trackmen Post 5-0 Record; Hager, Kavanaugh Set Marks

The Bearcat track team, coached by Earl Baker, finished 5-0 in outdoor dual and triangular meets, second in the Graceland Relays, and sixth in the MIAA conference.

Three track records were established during the spring. Pete Hager cracked the 100 and 220 sprint records and distance man Kent Kavanaugh established a new open mile mark.

Hager broke his year-old 100 mark with 9.5 time in the Drake Relays and set the 220 mark of 20.9, breaking the late Herschel Neil's 1934 record. Kavanaugh reached a new peak for Northwest Missouri State in the Graceland Relays and later equalled the school's 880 record.

Normal Howlett, Sikeston, high point man for the

Joe Spinello Receives National Recognition

Coach Burton Richey has received word that Joe Spinello, MSC third baseman, finished seventh nationally in the college division in triples.

According to the National Collegiate Athletic Bureau, this rating is prior to tournament play, which also counts in statistics.

Spinello hit five triples in seventeen games for a 0.29 leaders in triples, Thomas, Johns Hopkins, and Giroux, Ithaca, have five in 13 games and six in 16, respectively, for a 0.38 average.

season, and Kent Kavanaugh, Hamilton, were chosen co-captains for 1968.

John Banning and Phil Frahm, seniors, are the only track lettermen who will not be returning. With a strong nucleus of experienced trackmen and incoming freshmen, the Bearcats should be even stronger next year.

Three top area distance men plan to attend MSC next fall. One of these, Clifford Nelles, William Chrisman High School, has been coached by Bill Summa, an MSC graduate. Two others, Charles Gilkison and Butch Gregory, Grandview High School, have been trained by Wallace Croy, another Bearcat alumnus.

Bob Bosch to Serve As Boys State Aide

Bob Bosch, assistant in the Field Service Office, left today to serve on the staff of Missouri Boys State, Central Missouri State College, Warrensburg.

A University of Missouri junior, Bosch will be serving his third year as assistant to the director of public relations. His major duties will include sending out press releases, advising the newspaper staff, and editing a yearbook-brochure.

Previously Bosch, a former MSC student, served as editor of the newspaper at the American Legion citizenship program.

Bosch taught sports sessions at the Publications Workshop this week.

40 Lettermen Expected To Return to Squads

The Spring sports teams at Northwest Missouri State compiled a .757 victory record, winning 37 and losing 9.

With only seven men lost by graduation, the 40 returning prospects for next year's teams are promising.

The NWMSC athletic committee, headed by H. R. Dietrich, recently approved the lettermen recommended by the four coaches of spring sports. They are as follows:

BASEBALL, coached by Dr. Burton Richey: Benny Cain, Joe Spinello, Kansas City; Don Hicks, Emerson, Iowa; John Helsel, Lou Mooney, St. Joseph; Mike Kurtz, Scott Kurtz, Oregon, Mo.; Victor Mitchell, Bob Nelson, Independence; Don Orlowski, El Paso, Tex.; Leon Muff, Crete, Neb.; Dave Ross, Belleville, Ill.; Don Sears, Des Moines; Wayne Vierk, Lansing, Ill.; Fred Wise, Lytton, Iowa, and Dave Price, Marion, Iowa, a provisional letterman.

TRACK, coached by Earl Baker: Iowa lettermen — John

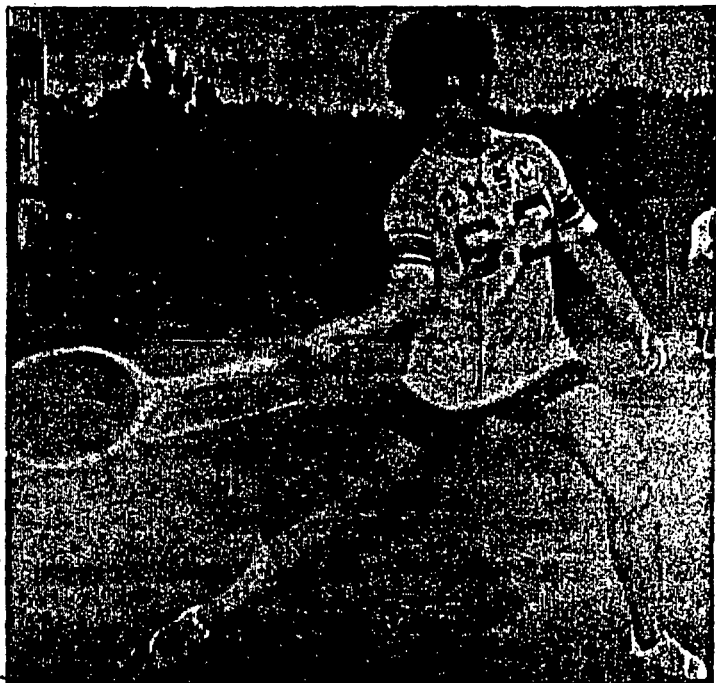

Banning, Knoxville; Stan Carson, Tabor; Tom Dalhousie, Fremont; Phil Frahm, Denison; Gary Hansen, Marion; Pete Meindertsmas, Newton.

Peter Hager, Lansdale, Pa.; Mitch Hauna, Collegeville, Pa.; Normal Howlett, Sikeston; Kent Kavanaugh, Hamilton; Larry Parman, Perry Courtney, Maryville; Dan Reed, Keokuk, Iowa; Lewis Garrett, Independence; James Neal, Martin, Mo.; Schwarzwald, Kansas City; Roger Stucki, St. Joseph.

GOLF, coached by Athletic Director Ryland Milner: Stephen L. Anderson, Elk Grove Village, Ill.; James Austin, Trenton; Joe Leffingwell, Mendocino, Calif.; Joe Logan, J. R. Watsabaugh, Maryville; Michael Lorimer, Farragut, Iowa; Larry Maiorano, Auburn, Neb.

TENNIS, coached by Robert Gregory: James Crozier, Maryville; Bruce Horrell, Carbon Dale, Ill.; Lynn Manart, Council Bluffs; Richard Schilling, Robert Schilling, St. Joseph; George Varchola, Saddlebrook, N. J.

Camper Enjoys Courts

Ann Asbell, with racket in hand and feet firmly planted, is caught in high gear at the MSC tennis courts.

Enrolled for the music camp, Ann, class of '70 from Maryville R-II High, is one of many finding the courts available for fun and recreation. There is nearly always someone, whether young or not so young, to be found enjoying the sun and strenuous exercise which tennis provides.

Baseball Team Proves Mettle In Second Season Together

The 'Cat baseball team, coached by Dr. Burton Richey, moved from a 9-18 record of the past year to a 14-5 record this season and earned second place in the MIAA conference.

The ball club during the two years was composed of essentially the same men, Coach Richey pointed out, adding

that experience seemed to account for the improved record.

Bob Nelson led the club in batting average, .316; runs batted in, 14; singles, 14; and home runs, 2. On the basis of his record, he was named by his teammates the "Most Valuable Player for 1967."

The team had evenly dispersed power as 10 men had 6 or more RBI's for the season. Joe Spinello, another long ball hitter, led the team in doubles, 3, and triples, 5. He also led the team in walks, 13.

In the pitching department Scott Kurtz struck out 61 in 40 innings. Pitchers' records were, Kurtz, 4-0; Don Orlowski, 4-1 and a .98 ERA; Don Sears, 4-2 and a 1.75 ERA; and Vic Mitchell, 2-0, for the season. The entire pitching staff will return next year.

Coach Richey stated that defensive play is the one department that needs to be improved next year. Errors cost the team all five losses.

At the end of the season, the team elected John Helsel, St. Joseph, a senior, and Leon Muff, Crete, Neb., co-captains. Helsel and Mike Kurtz, Oregon, Mo., were the only seniors on the team.

QUOTABLE QUOTES . . .
"Nothing can give a parent more pride than to have his child do the right thing at the right time," stated Dr. Donald Armstrong in a recent on-campus speech.
